## VERTICAL DESIGN BABY CHANGING STATION

Since the introduction of the vertical design baby changing station in 1987, it has become firmly established as a cost effective, low maintenance tool to serve customers and gain a public relations advantage.

Because the vertical station's compact design requires only 22 inches of horizontal wall space, it has become a favorite for use in the smallest of restrooms.

### Standard Features:

- Vertical design extends no more than 4 inches from wall when closed.
- Every unit is reinforced with steel-on-steel hinges and 10-gauge steel mounting supports which puts steel up against the mounting surface.
- Changing platform rests at a slightly upward angle, so that even when the weight of the child is added, the platform will not descend past the horizontal plane.
- Can withstand heavy static loads and operate safely for years to come, up to 350 pounds or 159 kilos.
- Gas shock mechanism first lifts door from open position, then brakes its closing motion to prevent the trapping of fingers.
- Generous concave bed makes changing easier and safer.
- Safety straps feature snap-lock fasteners to hold child secure.
- Chemical-free sanitary liners provide full coverage of the large changing area and are made from biodegradable tissue.
- Step-by-step graphic instructions in addition to safety messages in 6 languages.
- High-impact polyethylene resists odors, has no sharp corners and cleans easily.

### Optional Features:

- Five-year warranty on all parts and labor.
- \$20 million products liability policy.
- Optional factory-installed lock secures station from vandalism.

### Installation:

- Stations can be installed to comply with current ADA regulations.
- Installs easily, requiring only four bolts.
- Shipped with an installation kit which includes easy to follow directions, all the necessary hardware and metal door plaques.

### Unit Dimensions:

|                  |  |
|------------------|--|
| Height           | 36" (914 mm)   |
| Width            | 22" (559 mm)   |
| Depth            | 5" (127 mm) When Closed;<br>35" (889 mm) When Opened |
| Changing Surface | 420 Sq. Inches                                       |

Available in White or Grey.

#### HORIZONTAL DESIGN BABY CHANGING STATION

In response to popular demand, Koala Corporation created the horizontal design changing station for areas with narrow passageways.

Choose the station which best fits your space constraints. Both the horizontal and vertical design baby changing stations can be installed to comply with current ADA regulations.

##### Standard Features:

- Horizontal design extends no more than 4 inches from wall when closed.
- Every unit is reinforced with steel-on-steel hinges and 10-gauge steel mounting supports which puts steel up against the mounting surface.
- Changing platform rests at a slightly upward angle, so that even when the weight of the child is added, the platform will not descend past the horizontal plane.
- Can withstand heavy static loads and operate safely for years to come, up to 250 pounds or 113 kilos.
- Gas shock mechanism first lifts door from open position, then brakes its closing motion to prevent the trapping of fingers.
- Generous concave bed makes changing easier and safer.
- Safety straps feature snap-lock fasteners to hold child secure.
- Chemical-free sanitary liners provide full coverage of the large changing area and are made from biodegradable tissue.
- Step-by-step graphic instructions in addition to safety messages in 6 languages.
- High-impact polyethylene resists odors, has no sharp corners and cleans easily.

##### Optional Features:

- Five-year warranty on all parts and labor.
- \$20 million products liability policy.
- Optional factory-installed lock secures station from vandalism.

##### Installation:

- Stations can be installed to comply with current ADA regulations.
- Installs easily, requiring only four bolts.
- Shipped with an installation kit which includes easy to follow directions, all the necessary hardware and metal door plaques.

##### Unit Dimensions:

|                  |  |
|------------------|--|
| Height           | 20" (508 mm)   |
| Width            | 35" (889 mm)   |
| Depth            | 4" (102 mm) When Closed;<br>20" (508 mm) When Opened |
| Changing Surface | 442 Sq. Inches                                       |

Available in White or Grey.

## COMPACT DESIGN CHILD PROTECTION SEAT

The Koala Bear Kare child protection seat provides peace of mind for parents by allowing them to seat their baby safely in the restroom stall or fitting room with them. The seat eliminates the danger and discomfort of leaving the baby unattended outside the stall, laying the infant on the floor, or balancing the baby with one hand.

The compact design fits into the smallest stalls and fitting rooms. The concave seat, snap-lock safety straps and smooth polyethylene construction add up to a comfortable and secure seat for infants and toddlers.

### Standard Features:

- Requires less than 2 square feet of wall space. Fits into the tiniest of stalls and fitting rooms.
- Engineered to withstand a static load of up to 150 pounds.
- Concave back and seat tilt child back for safety.
- Safety straps extend over shoulders and between legs for extra security.
- When closed, seat extends less than 6 inches.
- Polyethylene construction resists odors, cleans easily and has no sharp corners.
- Child stays in full view at all times!
- Great for holding purses, shopping bags and briefcases.

### Additional Features:

- Five-year warranty on all parts and labor.
- Attractive door decal lets parents know where child protection seat is available.
- \$20 million product liability policy.
- Quick turnaround.
- Made in the U.S.A.

### Unit Dimensions:

Height 19" (483 mm)  
Width 12" (305 mm)  
Depth 5.75" (146 mm)

Available in Cream.
