SELECT PRODUCTS CONTINUOUS HINGES

Select Products Limited of Kalamazoo, Michigan is a manufacturer of aluminum continuous-gear door hinges. The Select continuous gear hinge is a heavy-duty hinge system designed for commercial application with wood, aluminum and hollow metal doors and frames for storefront, office, school, hospital, and many other applications for both new construction and retrofit applications.

Benefits and advantages of an aluminum continuous gear hinge are many:

- Full length door height support.
- Streamlined, pleasing-to-the-eye appearance.
- No exposed screws, bolts, pins or knuckles.
- Anodized aluminum finish won't rust.
- Provides weather-proof, tamper-proof and noise reduction features.
- No cutouts or reinforcements in doors and frames required.
- Retrofit installation with existing doors and frames is easy and economical.
- Long entrance life - tested at over 1,000,000 cycles.

With conventional hinging systems, the top hinge or pivot handles close to 100% of the opening force of the door. With heavy usage, the top hinge or pivot can experience early, excessive wear, creating a failed entrance. A continuous gear hinge bonds the door and frame into an integrated, sag-free unit and "kick-back" energy is dissipated along the length of the door and frame. This improved engineering design has indisputable advantages over two and three hinge/pivot systems, and adds years of trouble-free, maintenance-free life to the entrance.

Features:

- Pinless assembly of 3 interlocking extrusions.
- Chemically lubricated bearings.
- Templated screw hole pattern.
- 410 stainless steel fasteners available in self-tapping or self-drilling.
- Standard and custom lengths available.
- Standard and custom finishes available.
- Standard and heavy duty available in all models.
- Lead-lined duty available in mortise models.
- All mortise hinges are fire-rated - call for details.
- Full and half surface available fire-rated, call for pricing.

Standard Finishes:

Clear Anodized - 204R1

Dark Bronze Anodized - .7 Mil

Custom Options:

Custom anodizing.

Painted colors can be matched on gear cap only or on the complete hinge.

Standard Lengths:

7'0" (83") - 7'2" (85") - 8'0" (95") - 10'0" (120")

Custom Lengths:

Available upon request with additional lead times. All Select hinges can be field cut to exactly fit doors, or cut in the factory to specified lengths. Any custom length hinge that requires the removal of 5" or more will have an additional fee.
