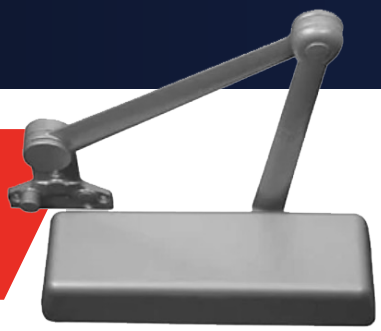
Door Closers & Hinges

Repair-Ready Essentials

High-cycle openings wear out fast. Replacing closers and hinges extends door life and improves safety with minimal labor.



LCN

LCN 1250 Series Door Closer

Reliable, low-maintenance door control built with top-quality components for long-lasting performance. Designed for easy replacement using the most common hole pattern in the industry.

LCN 1260 Series Door Closer

Easy retrofit for light commercial openings, common aftermarket hole pattern and non-handed design simplify interior and exterior replacement. Proven cast iron durability, ADA-compliant performance delivers reliable door control in low to moderate traffic applications.

LCN 4040XP Series Door Closer

High-use performance, designed to handle heavy traffic and abuse where standard closers are insufficient. Robust internal construction, reinforced components and advanced sealing extend service life and reduce maintenance.

McKinney ASSA ABLOY

McKinney Five Knuckle Heavy Weight Full Mortise Series

Perfect for high-traffic doors, supports schools, hospitals, and public buildings with frequent use. Heavy-duty stainless or brass construction, engineered for long-lasting, low-maintenance operation.

PEMKO ASSA ABLOY

Qualifying Product for Replace, Repair and Rewards Program!

Pemko Concealed Aluminum Continuous Geared Hinges

Flush double-door operation, accommodates standard door thicknesses while maintaining a smooth profile. Heavy-duty anodized aluminum construction, resilient design withstands frequent use with minimal upkeep.

Pemko Full Mortise Stainless Steel Pin and Barrel Continuous Hinges

Edge-mounted high-traffic solution, ideal for doors exposed to heavy use and abuse. Stainless steel pin and barrel construction, provides dependable, low-maintenance performance.

When to Replace

Worn keys and failed locks compromise security. Replace locksets and cores to avoid full door replacement and reduce call-backs.

Schlage ALX Series Cylindrical Locks

Simplified installation for standard duty doors, non-handed, ADA-compliant levers fit a variety of commercial applications. Heavy-duty spring design, smooth operation minimizes droop and reduces ongoing maintenance.

Schlage L Series Heavy Duty Mortise Lock

Secure operation for high-traffic doors, non-handed design and breakaway spindle protect against vandalism. Premium construction, exceeds ANSI Grade 1 and UL fire-ratings for extended service life.

Best E Series Mortise & Rim Cylinders

Interchangeable core for system flexibility, compatible with existing BEST systems and masterkey setups. Precision-machined brass or bronze, resilient construction ensures dependable, long-lasting use.

Adams Rite
ASSA ABLOY

Adams Rite 4036/4066 Mortise Cylinders

4036 mortise cylinder operates any Adams Rite lock or latch requiring a mortise cylinder. 4066 mortise thumb-turn can be used without keys to operate latch/lock.

4900 Series HD Adjustable Deadlatch

Flexible operation for aluminum stile doors, adjustable design allows two-way or exit-only traffic. Rugged construction, multiple backsets and faceplate options ensure long-lasting, reliable performance.

Adams Rite 4590 Series Latch Paddles

Intuitive push/pull operation, makes opening latched doors as natural as unlatched ones Aluminum construction, robust design delivers dependable performance in high-use environments.

Exit Devices & Panic Hardware

Keep Doors Operational

Exit devices take constant abuse. Retrofit and repair options save time and keep doors code-compliant.

Adams Rite 8800 Exit Device

Qualifying Product for Replace, Repair and Rewards Program!

Adams Rite 8800 Series Exit Devices

Narrow stile solution for aluminum and glass doors. Designed for repair and retrofit applications. Reliable exit performance, rugged construction with optional electric latch retraction supports demanding commercial applications.

BEST dormakaba Group

Best Precision APEX 2000 Exit Devices

Well-suited for demanding openings, simplified internal design delivers smooth operation across multiple door configurations. Grade 1 heavy-duty performance, robust construction withstands high traffic and abusive use with minimal maintenance. Ideal for replacement of worn panic hardware

Falcon 1690 Exit Devices

Well-suited for demanding applications, designed to accommodate heavier doors and higher usage levels. Proven durability, robust components help reduce service calls in active facilities.

FALCON

Falcon 1790 Exit Devices

Designed for high-traffic and abuse-prone openings, supports complex commercial and institutional requirements. Heavy-duty reliability, reinforced construction delivers long service life under frequent use.

Falcon 24 Series Exit Devices

Practical option for standard openings, streamlined design fits everyday commercial door applications. Reliable day-to-day performance, built to support consistent use with minimal upkeep.

Falcon 25 Series Exit Devices

Enhanced solution for busier doors, flexible design adapts to higher traffic commercial environments. Resilient construction, supports frequent operation while maintaining smooth, dependable performance.

VON DUPRIN

98/99 Series Rim Exit Devices

Versatile panic hardware solution, fits single or double doors with mullions and supports a wide range of applications. Grade 1, code-compliant performance, UL listed and ANSI certified for reliable operation in high-traffic environments.

ASSA ABLOY

2005M3 Smart Pac III

2005M3 is an in-line power control that is able to receive input voltages from 12 to 32V AC or DC. The built-in bridge rectifier provides 12 or 24VDC output. Under continuous duty operation, the output VDC is reduced by 25% to extend the life of the strike.

Smart Electrified Upgrades

Complete the Electrified Opening

Power, transfer, and conversion components designed to support reliable electrified hardware installations without replacing the entire door.

Electrified Hinges

Transfers power through the hinge side of the door. Clean solution for electrified locksets and devices.

IVES 5BB1 Electrified Hinge

Command Access ETH

McKinney ElectroLynx QC Hinge

VON DUPRIN

Electrified Power Transfer (EPT)

Power Transfers

Simplifies power and monitoring connections, provides a secure wiring path from door to frame for easy integration. Reliable, low-maintenance operation, supports consistent power delivery and door status monitoring in high-use openings.

COMMAND ACCESS Exit Device Motor Kits

Upgrade existing mechanical exit devices to electrified solutions without replacing the entire assembly. Command Access conversion kits reduce labor, preserve the original opening, and extend the life of installed hardware. An ideal option for retrofit access control projects.
